

## Minimize Compliance Risk with Corridor's Home Health CoP Compliance Workbook

Your agency's level of compliance with federal regulations directly affects its reputation, licensing and financial stability. In order to be effective, compliance must become an integral part of your daily operations. Corridor has what you need! The Home Health CoP Compliance Workbook is based on the newly approved Home Health CoPs.

To assist your organization in preparing to meet the newly revised CoPs, Corridor has arranged the workbook by CoP standard number. Two columns are available to assist your organization:

- The Compliance Requirements column is a checklist to prompt the review of current policies, procedures, processes and materials
- The Organizational Strategy column is used to list items that you currently utilize for CoP compliance and to list the opportunities for development of additional items, if needed

Once your organization identifies the "to-do list," work can begin on the development of what is needed to bring your organization into CoP compliance.
